

IN THE SPECIFICATION

Please replace the paragraph at page 11, lines 24-26, with the following rewritten paragraph:

In the communication system, the pilot data can be transmitted uninterruptedly ~~in a field including no other data but the pilot data~~ by a data field other than a pilot field, when the data field does not transmit any other data.

Please replace the paragraph at page 19, lines 4-7, with the following rewritten paragraph:

The communication system of the present embodiment 2 is configured such that it transmits the pilot data uninterruptedly ~~in the fields including no other data but the pilot data~~ by a data field other than a pilot field, when the data field does not transmit any other data (ACK/NACK or QI).
